PERFORMANCE

More than capable.

By taking advantage of the light and strong Toyota New Global Architecture (TNGA) platform, Camry is engineered for optimized handling and ride quality. And with a low, wide stance, Camry delivers a crisp and responsive feel. Indulge your sporty side and take the long way home.

Impressive 4-cylinder and V6 engines

Camry offers a compelling choice of gasoline engines: a proficient 2.5-liter Dynamic Force 4-cylinder and a robust 3.5-liter V6, each delivering a quality blend of performance and efficiency.

Hybrid performance

Get the best of both worlds. Camry Hybrid's Dynamic Force 4-cylinder engine, along with a proven electric motor and smooth-shifting transmission, produces ample torque and has a manufacturer-estimated rating of 46 mpg combined.¹ And with available 19-in. wheels, Camry Hybrid proves it doesn't sacrifice style.

All-Wheel Drive

Available All-Wheel Drive (AWD) performance gives you peace of mind, no matter the forecast. When sensing slippage at the front wheels, Camry AWD can send up to 50% of the torque to the rear wheels for more grip in gravel, rain or snow.
